Did you know the In Motion Outdoors Grant has been extended to 2013?

Project Spotlight Jaycee Park- St. Charles Missouri

[Check out some of our 2012 Grant Recipients](#)

Jaycee Park in St. Charles, MO is just one of the many exciting projects we've had the pleasure and opportunity to complete for our clients this past year. The City of St Charles parks and recreation Department asked All Inclusive Rec to create a totally accessible playground for children of all abilities while working within a very unique space. We collaborated both with the Parks Departments team and with Unlimited Play, a local organization dedicated to the development of "Inclusive Playgrounds". We were also asked to develop a "natural" theme within the design scope of the playground, while also making sure it was Fun, Challenging, Exciting, and incorporating new and unique elements within the design. The main features of the park utilized different play events from both Elephant Play and Little Tikes Commercial Playgrounds. We were also able to utilize the exciting and very unique musical events from FreeNotes Harmony Park. The final part of the play area incorporated SofSurfaces Kroslock tile for the safety surface, ensuring the best fall protection for all kids. The parks and recreation departments' team also utilized and installed many creative features to enhance the "natural" theme throughout the entire park. The end result is truly amazing and is without a doubt a "One of a Kind" for the city and surrounding area; definitely something they should be extremely proud of.

Here's what Chris Atkinson, the assistant Park and Rec Director of St. Charles had to say about the completed project: "Pete and Stewart with All Inclusive Rec. were involved from start to finish and it was a pleasure to work with them. The kids and families of the City and the surrounding area love the new playground."

All Inclusive Rec cannot thank Maralee (Director of Parks and Recreation) and all her outstanding team, especially Chris and Neil enough for the opportunity to work for and with them on such an awesome project. We truly appreciated the opportunity.
