Coverworx Our Story

At Coverworx, we take pride in crafting steel-frame shelters and structures that combine durability with exceptional design. Made from high-gauge tubular steel, each of our shelters reflects the expertise and artistry of our team. Our ASTM-certified welders, structural fabrication specialists, and skilled design engineers bring years of experience to every project, ensuring that each structure meets the highest industry standards.

Our shelters feature a sleek, free-span design with no exposed fasteners, open truss members, or spaces for bird nesting making them not only functional but also low-maintenance. They come ready for easy assembly; no cutting, welding, or painting required.

Every shelter is finished with a sand-blasted, zinc-primed, 2.5-5.0 mil thick polyester powder coating, available in a variety of standard colors. The roofing is made from high-quality 24-gauge steel panels, pre-cut for your convenience, and offered in a range of colors and profiles.

Coverworx shelters offer virtually unlimited customization options, including handrails, overhead lattice, round or custom-designed support columns, Pine or Cedar Tongue and Groove overhead decking, and cupolas. We also offer corrugated and standing seam metal roofing on all structures. You can choose from standard shapes like squares, hexagons, octagons, and rectangles with open gable or hipped ends. If you can imagine it, we can create it—including custom shapes, curved tops, or a Coverworx “Vented Top” for added style and functionality. With Coverworx, the only limit is your imagination!

Steelworx SQUARES

FOUR-SIDED CANOPIES

Steelworx Squares combine the sleek, stylish look of a hip canopy with the balanced symmetry of four equal sides and a single, striking peak. These canopies offer a clean, contemporary design that's perfect for any site looking to make a bold statement. The square shape brings a unique sense of order and harmony, making it a standout choice for a variety of settings.

For larger installations, additional columns around the perimeter ensure the structure's integrity while maintaining that streamlined, elegant appearance. Whether you're designing a public space, a park, or any outdoor area, Steelworx Squares provide a perfect blend of form and function, delivering both beauty and practicality in one sophisticated package.

HEXAGONS

SIX-SIDED CANOPIES

Steelworx Hexagons offer the same elegance and timeless appeal as our octagon canopies, with the added advantage of a more streamlined design. With two fewer columns, these hexagonal shelters deliver that classic, sophisticated look while maximizing open space and enhancing the overall functionality. Perfect for those who want all the style and grace of an octagon, but with a sleeker, more efficient structure, Steelworx Hexagons are the ideal blend of beauty and practicality. Whether you're aiming for a polished, refined appearance or simply want to optimize your space, these canopies deliver on both fronts.

Six-Sided Canopies

Steelworx hexagon shelters are versatile and harmoniously fit into urban landscapes, park settings, or commercial spaces where a balance between style and functionality is essential.

The reduced number of columns simplifies installation and allows for flexible use of the covered area, making it ideal for high-traffic locations or multipurpose environments.

Whether you're seeking to create a focal point or a shaded retreat, hexagon shelters deliver a sleek design without compromising strength or durability, giving you the best of both worlds in one striking structure.

EIGHT-SIDED CANOPIES

Steelworx Octagons bring a touch of elegance and timeless beauty to any space. These canopies aren't just functional—they're a statement piece. With their intricate, eight-sided design, they add a decorative flair that elevates the look of any site. Whether you're looking to create a charming focal point in a park, a stylish gathering spot, or simply want to enhance the overall aesthetic of your space, Steelworx Octagons offer a sophisticated appeal that never goes out of style. Their classic design blends seamlessly with any environment, making them the perfect choice for those who want both beauty and durability in one stunning structure.

Open-Ended Gable Canopies

Steel open-ended gable canopies are an eye-catching architectural feature that seamlessly blend structural integrity with visual elegance.

Typically designed with a gabled roof supported by robust steel frameworks, these canopies offer the perfect combination of functionality and design.

The open-ended nature allows for unobstructed views and easy access, making them ideal for areas that require ventilation or open flow.

Their ability to integrate into various settings makes them adaptable for many different architectural styles, from modern to industrial or more traditional aesthetics.

Open-Ended Gable Canopies

In addition to their design flexibility, steel canopies are built with durability in mind. They are highly resistant to weather conditions, providing long-term performance with minimal maintenance. This makes them ideal for a wide range of applications, such as entrances, walkways, and outdoor seating areas, where protection from the elements is needed without sacrificing visual appeal.

Their versatility and strength make them suitable for commercial, industrial, and residential projects, offering a functional yet aesthetically pleasing solution to a variety of architectural needs.

CROSSING

SHELTERS

Our Steelworx Crossing Shelters offer endless possibilities for transforming a simple shelter into the focal point of your site. Whether you're starting with a classic gable or hip shelter, you have the freedom to customize and create a structure that truly stands out. Imagine starting with one of our standard designs and then mixing and matching gable and hip ends to craft something that's entirely your own.

But why stop there? The real magic happens when you begin to incorporate ornate design elements that add character and flair to your shelter. From intricate detailing to custom architectural end gables, these enhancements can elevate the aesthetic and create a shelter that's not just functional but also a true work of art.

Steel Crossing Shelters

With Steelworx, you're not limited by the ordinary. Your shelter can be as bold, imaginative, and sophisticated as you envision, making it a dynamic centerpiece that transforms the entire site.

Steel crossing gable canopies are both functional and aesthetically pleasing structures that provide essential protection and enhance the user experience at key crossing points.

By carefully considering their design and integrating additional features, these canopies can effectively meet the needs of various environments while contributing positively to the overall urban or architectural setting.

HIPS

CLOSED-END CANOPIES

Steelworx Hips deliver more than just basic protection—they elevate the entire aesthetic of your space. These canopies offer greater shelter coverage compared to a standard gable, all while utilizing a similar column layout and roof area. But the real advantage of a Steelworx Hip canopy is in the refined, finished look it brings to your project.

When you need a shelter that does more than just blend in, these hip canopies stand out with their sleek lines and enhanced design. They're perfect for spaces where you want to make a statement and create a polished, professional appearance that leaves a lasting impression.

WOOD CANOPIES

GLUE-LAMINATED

From classic gable shelters to stunning custom centerpieces, every Woodworx shelter is crafted with quality and style in mind. Our shelters come standard with 2" x 6" Southern yellow pine tongue and groove decking, topped with your choice of metal or shingle roofing. The structure is reinforced with glue-laminated framing and pressure-treated columns, all connected by powder-coated steel plates for a durable, long-lasting build.

For those looking to enhance their shelter's durability and design, you can upgrade the columns and rafters to sleek, powder-coated tubular steel, as showcased in our premium models. With a variety of roof and column options available, you can tailor your Woodworx shelter to perfectly suit your needs. And for an extra touch of functionality and style, many of our Woodworx models offer a Vented Top design, ensuring your shelter is as practical as it is beautiful.

Custom RAL Powder colors available
Frame only

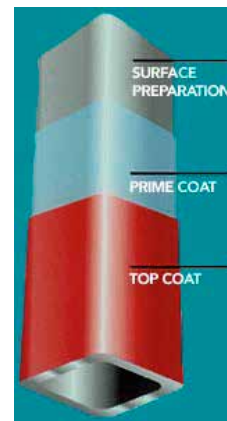

Choose from over 100 color options to fit your exact requirements!

Powder coating with zinc rich primer and TGIC polyester

Shot blasted steel with factory applied zinc rich primer and TGIC Polyester (2.5 – 3.5 mil thickness on exterior).

Powder Coat Application Process

Surface Preparation

SPG commercial blast to a profile of 1.0 mil.

Prime Coat – Zinc-rich epoxy primer is applied to a 2.5 – 3.5 mil thickness and then baked at 350°F for 20 minutes to gel the primer. This doesn't completely cure the primer; so when the top coat is applied, it allows the primer and top coat to cross-link for better adhesion.

Top Coat – TGIC Polyester applied to a 2.5 – 3.5 mil thickness and baked at 400°F

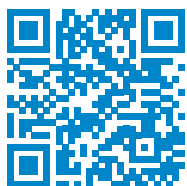

10 Year Limited Warranty

Coverworx-Recreational Architecture, a division of Ross and Barr, Inc. (hereinafter "Coverworx") warrants that the structure or product purchased will be free from defects in materials and workmanship under normal use for period of ten (10) years from the delivery date. The entire liability of Coverworx and its suppliers, and the exclusive remedy shall be for Coverworx to repair and replace materials found to be defective. The repair or replacement of materials shall be at the expense of Coverworx. This limited warranty is void if any damage has resulted from abnormal use, abuse, accident, vandalism, poor installation, lack of maintenance, misapplication, service or modifications by someone other than Coverworx or its suppliers. This warranty excludes color fading within ten (10) nautical miles of any area retaining salt water or brackish water. Any replacement part under warranty is warranted for the remaining original warranty period or 1 year, whichever is longer.

In the event of a defect claim, Coverworx shall be notified in writing within thirty (30) days from discovery, no later than thirty (30) days from the receipt of the notice. Coverworx management will determine whether to repair or replace defective materials and respond in writing to advise how Coverworx will proceed on the warranty claim. Coverworx disclaims all other warranties, expressed or implied, including but not limited to, implied warranties of merchantability and fitness for a particular purpose for the product and any accompanying materials required for installation. Coverworx will not be liable for any damages arising out of the use or inability to use the product, regardless of whether notification of such damages has been given.
